CAN-BRAC VAN-BRAC SAFETY CLAMP™

OVERVIEW

The CAN-BRAC™ Van Brac Safety Clamp is the latest in our CAN BRAC line of products that combine industry established quality and hands on, practical innovation. The Van Brac Safety Clamp like many of our brackets was designed with Installation in mind aiming to make it faster, easier and above all safer.

Traditionally an installers fight gravity and weight, however by using a Van Brac one is able to temporarily and safely hold the signal head until the gusset tube clamps can be permanently installed. Using the Van Brac the installer has both hands free to align or adjust the head. installation with the Van Brac Clamp is faster, more efficient and above all safer for the installer and their surroundings.

The CAN-BRAC™ Van Brac Safety Clamp attaches to the signal assembly via the extruded tube, not requiring additional specialized tools or tricky torque specs. Standard SAE wrenches are all you need to install. No need for a helping hand or second wrench when tightening the cable. It's so easy, all you need to do is install it and forget it.

The CAN BRAC™ Van Brac Safety Clamp is made of aluminum, designed for maximum strength, corrosion resistance and ductility.
