

CAN-BRAC BAND SIGNAL ASSEMBLY

OVERVIEW

The CAN-BRAC Band Signal Assembly is made of primary grade aluminum alloy designed for maximum strength, corrosion resistance and ductility. This design installs on any size mast-arm from 2 2/8" and up using bands.

The CAN-BRAC Band has rigid and captive mounting hardware (made of stainless steel)—available in Horizontal and Vertical options (72° rotation).

The CAN-BRAC Pipe Extrusion has a unique profile, which eliminates the need for filler extrusions and cross threading during assembly and installation. Flexible wire access extrusion cover ensures easy assembly and maintenance, especially during winter conditions.

FEATURES—CAN-BRAC BAND SIGN ASSEMBLY

- Quick and simple installation
- Full stainless steel hardware
- Fits multiple signal configurations: Vertical, Horizontal, 1-Way, 2-Way and Cluster
- Ships fully assembled and requires no special tools for installation
