

# CAMERA SETUPS

## OVERVIEW

As roadway and intersection monitoring becomes more important for municipalities, the prevalence of cameras will increase. We are able to apply the same adherence to design, quality and safety for securing cameras as we do for securing signals. With our unique style of engineering, we offer camera setups that are exclusive to our line of products.

There are several different configurations, with alternate sizes to fit the needs of any intersection. Our camera setups combine our strongest and most used brackets such as; our Can-Brac Universal and Rubber Cushion Mast Arm Hanger.

## FEATURES—CAMERA MOUNTS

- Durable and Safe
- Minimizes stress
- Simplified installation
- Stainless steel hardware
